## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 8-20, filed 10/10/2006, with respect to the rejection(s) of claim(s) 1-19 under USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Busch in view of Dybro et al.

### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claim 1 rejected under 35 U.S.C. 103(a) as being obvious over Busch (US 6,076,894) in view of Dybro et al. (US 5,820,056).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention "by another"; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the

Art Unit: 3616

application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(I)(1) and § 706.02(I)(2).

Regarding claims 1 and 11, Busch discloses having a vehicle occupant protection device including: first (30) and second (32) seat belts; and first (42) and second (36) limiting retractors. However, Busch fails to disclose the retractors being load limiters having sensors, and also having a controller to controlling the limiters. Dybro et al. discloses having a retractor (20) with a load limiting spool (24) and having a having a sensor (300 and 302) for sensing a characteristic of at least one of the occupants and the vehicle, and also having a controller (col. 5, lines 32-65) that is responsive to the at least one sensor to controlling the load limiters.

#### ***Allowable Subject Matter***

4. Claims 2-10 and 12-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pywell et al. (US 6,139,111) is a four-point restraint apparatus that has two-shoulder belts with corresponding load limiters.
